

ACKNOWLEDGEMENT

“Gratitude” is a refrain in my life that must always be repeated. Many people form a part of this simple anthology and to whom I owe a substantial measure in completion of my project work.

I would like to express my special gratitude and thanks to Google.

My thanks also go to **freewebhostingarea.com** for hosting my data in server free for 30 days.

I am thankful to **Mr. Vimal Prakash, Tech lead at WIDAS** for providing me with great opportunity to undergo the project.

AMARESHWAR MANJUNATH BHAT

ABSTRACT

The “WIDAS” is an android application. This application was mainly developed to help the employees and the clients of WIDAS.

This thesis aims to bring the details of the official website of the company WIDAS. The information becomes more handy and fast when it is coming into mobile application. The user of WIDAS and client can take the great advantage of this application and stay connected always. This project is designed and developed keeping that factor into mind, and a little effort is made to achieve this aim. This project can even be implemented on IOS, Desktop app and plugins. I have built an android based cell phone application which is of online using Web Services & Material Design. Having said that its just of size 2.1 mb, so that the thesis can be worthy of real life experience.

Android Application

This is mainly developed for the purpose of interview at WIDAS.

Team size: 1

Given Project duration: 25 days

FEATURES AND IMPLEMENTATION

Beauty of this Application is Material design for new Android versions.

Apart from that it involves Web Services.

Keeping companies requirement in mind I have created dummy server.

Created a Backend Design for WIDAS in the name of “amartaskwidas2.orgfree.com”

Password :*****

Reference: <https://www.widas.de/>, <https://www.facebook.com/>,
<https://www.linkedin.com/>

IDE: Android Studio

Concepts & languages used in project:

Web Services: Retrofit

Database : PHPMyAdmin for SQL database

Parsing : JSON

PHP

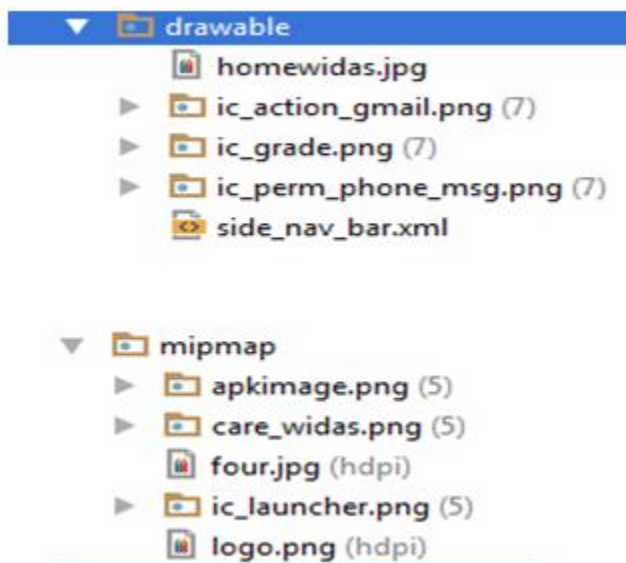

Material Design

POSTMAN: To check the responses

Visual Design for App WIDAS

    this.finish();
}
```

actionBar.setDisplayShowTitleEnabled(true);

Set the text for abouttext

Set the text for aboutmore

gallery_activity.java

```
CoordinatorLayout
  AppBarLayout
    CollapsingToolbarLayout
      app:layout_scrollFlags="scroll|exitUntilCollapsed"
      ImageView
        Toolbar
          app:layout_collapseMode="pin"
        Toolbar
      CollapsingToolbarLayout
    AppBarLayout
  RecyclerView
CoordinatorLayout
```

Activity_Gallery.java

Set the layout manager as follows

```
layoutManager = new GridLayoutManager(this, 2);
```

When clicking on Back button or clicking on back arrow it go to home

```
actionBar.setDisplayHomeAsUpEnabled(true);
```

```
{
  android.R.id.home:
    this.finish();
}
```

```
actionBar.setDisplayShowTitleEnabled(true);
```

Create a string array as follows

```
final String[] myImageList = new String[]{WidasConstants.IMG1, WidasConstants.IMG2,
WidasConstants.IMG3, WidasConstants.IMG4, WidasConstants.IMG5, WidasConstants.IMG6};
```

Pass the list to GalleryAdapter
Then,

Using Handler display image in ImageView.

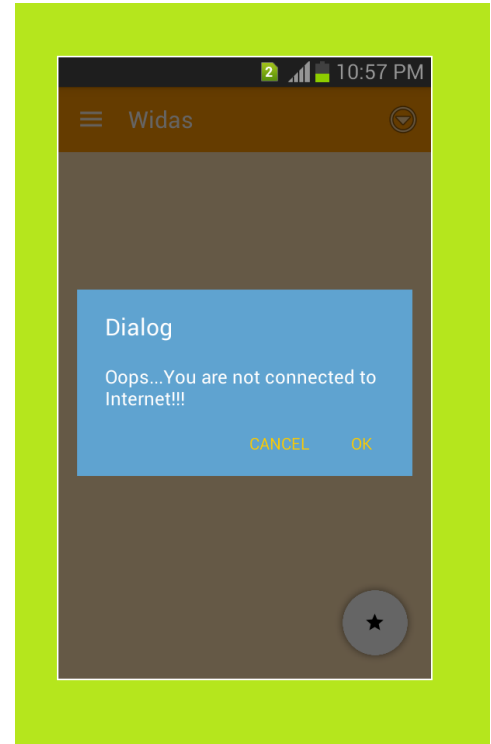

Screenshots/ User Manual

1. Splash Screen

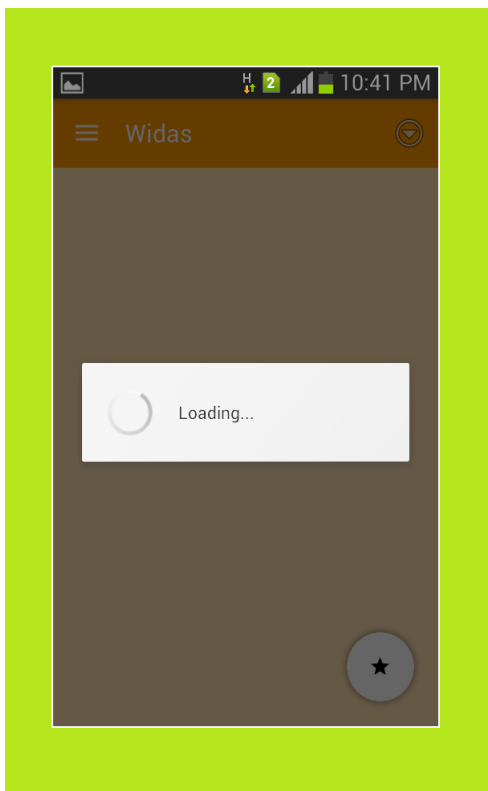

This is a Splash Screen for WIDAS where Logo will be animated as slide up.

2. Alert Box

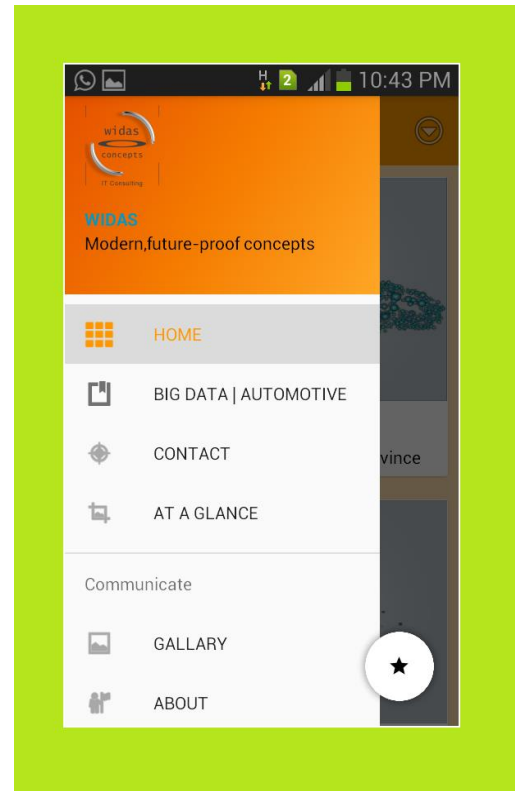

This is an Alert Box to remind user to enable the Internet Connection.

3. Progress Dialogue

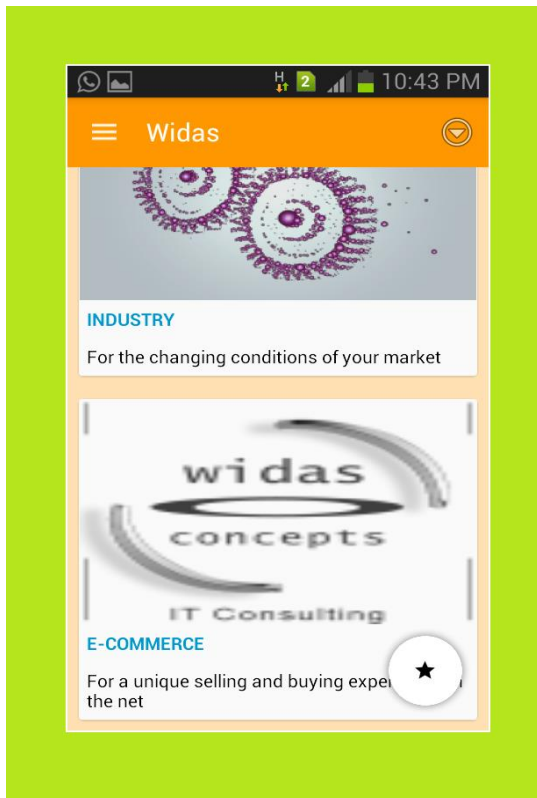

This is Progress Dialogue to show the data is fetching from the Server.

4. Navigation Drawer

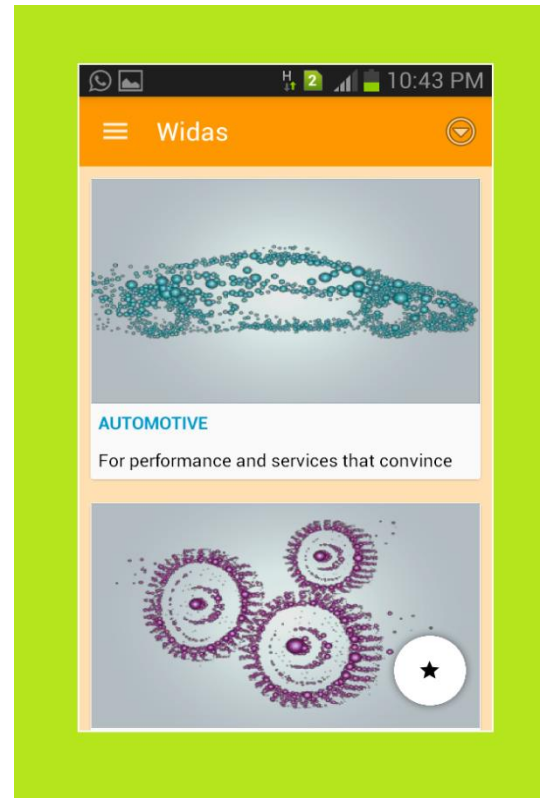

This is Navigation drawer having menu icons such as HOME, BIGDATA, CONTACT, AT A GLANCE, GALLERY and ABOUT.

5. Home with Picasso during load image

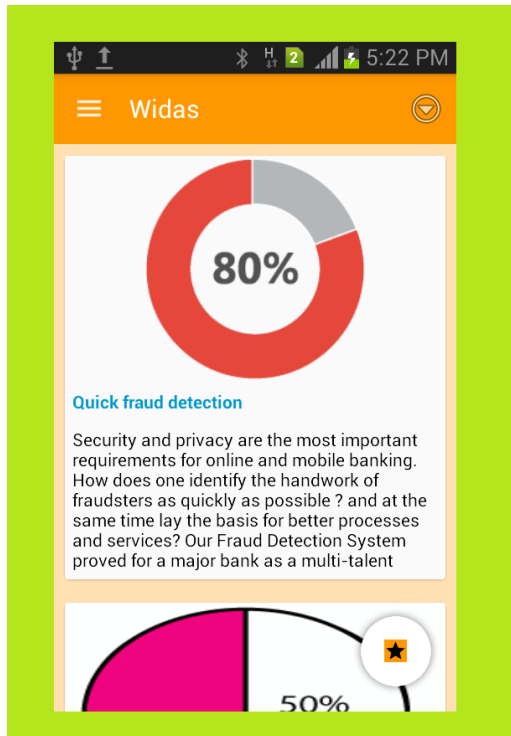

6. Home after download

Here the Image, Title and Descriptions are displayed in RecyclerView / List with in CardView from the server. If image is delay in retrieving, the default image Logo will be displayed by Picasso place holder. And if any problem in server, Picasso will display the logo in place of error image.

This is the window after the complete loading of data from server.

7. BigData

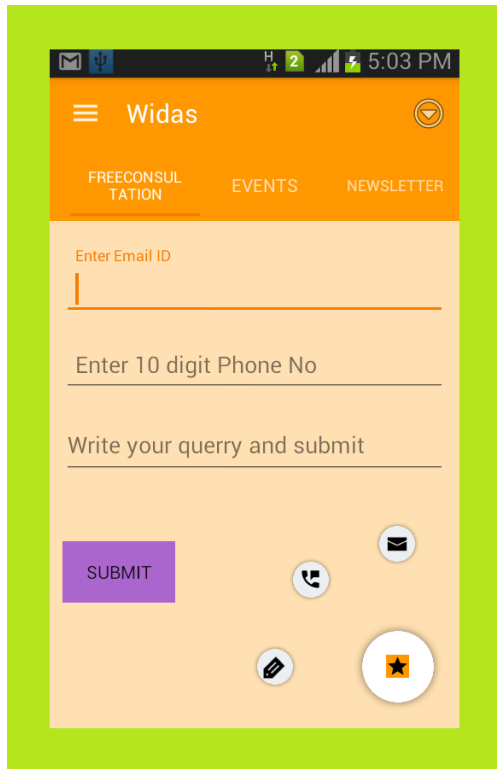

This is a window of BigData having similar structure like Home.

8. Floating Button

The screenshot shows the Widas mobile app interface. At the top, there's a status bar with various icons and the time 5:03 PM. Below the status bar is an orange header with the Widas logo and a menu icon. The main content area features a form with three input fields: "Enter Email ID", "Enter 10 digit Phone No", and "Write your query and submit". Below the form is a purple "SUBMIT" button. To the right of the submit button, there are four floating action buttons (FABs) arranged in a 2x2 grid. The FABs contain icons for a call, a message, an email, and a star.

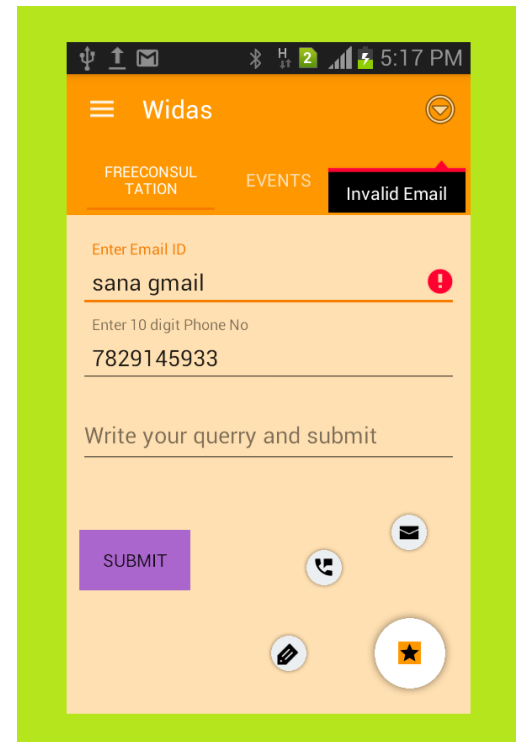

This is a Floating Button and having sub icons like call, Message and Email.

9. Hint

Here is Hint. Which tells the user what to type in the text. When user click on EditText the hint will smoothly draw to above the EditText.

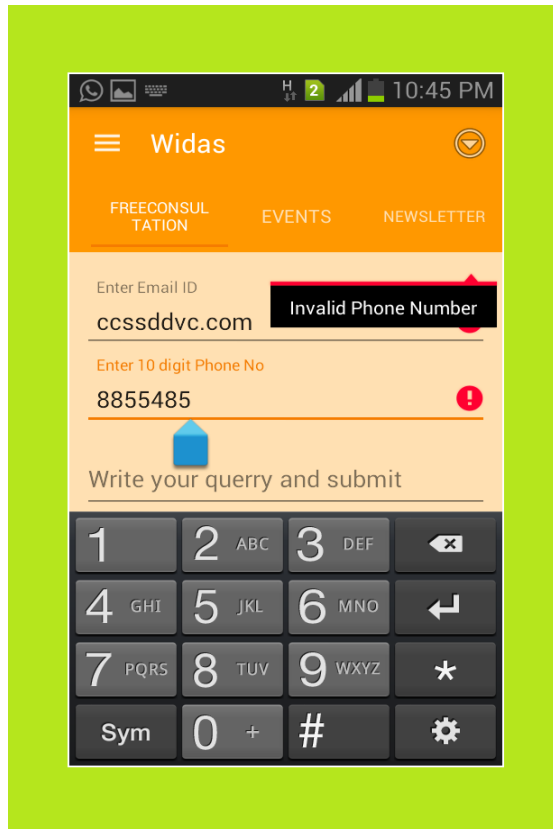

10. Email Validation

Email Keypad is used. is used.

To increase the user experience Email Validation is included. For wrong input it display the error message and notify the user by red mark

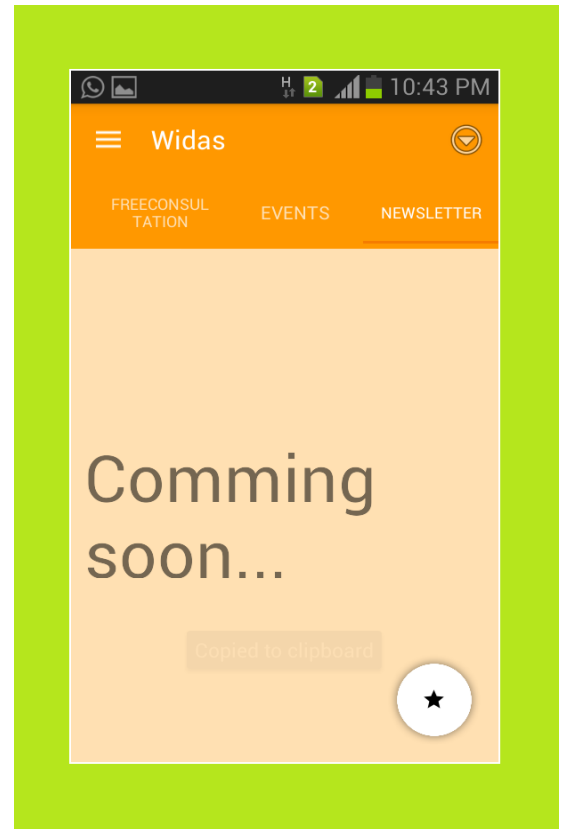

11. Phone Number Validation Tab1

To increase the user experience PhoneValidation is included. For wrong input it display the error message and notify the user by red mark.

Phone Keypad used.

12.Tab2, Tab3

These are tabs for Events and News which will be updated based on company requirements.

13. Gallery with Picasso Picasso Holder

14. Gallery with Image Mover & Grid View

Here there are ImageView and GridView with value 2. In image View the pics will change for every 10 seconds. And in Grid view there is CardView to display images, Meantime to displayed empty image we use Picasso Placeholder.

This is how Gallery looks after loading of images.

15. Gallery Collapsing ToolBar

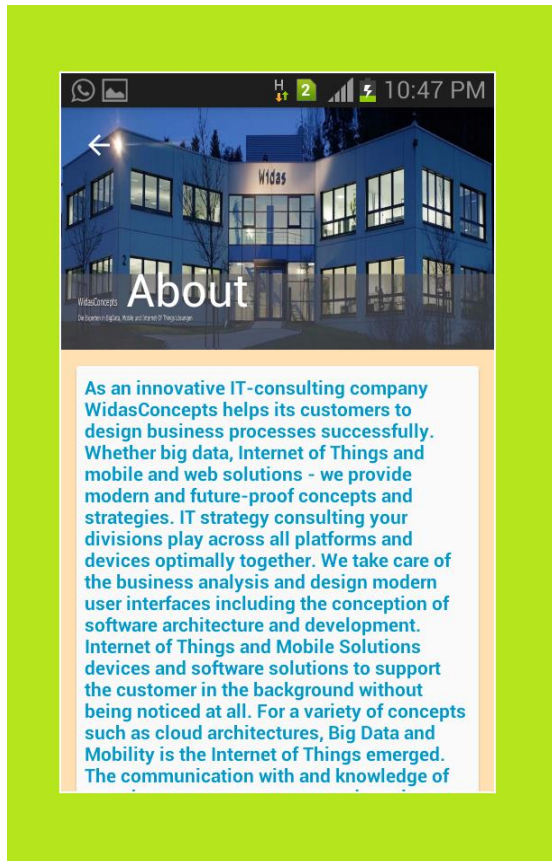

Here the Gallery is scrolled exit until it collapsed.

16. Blog WIDAS

OnClicking the menu icon “more” it will take you to the official Blog of WIDAS.

17. About

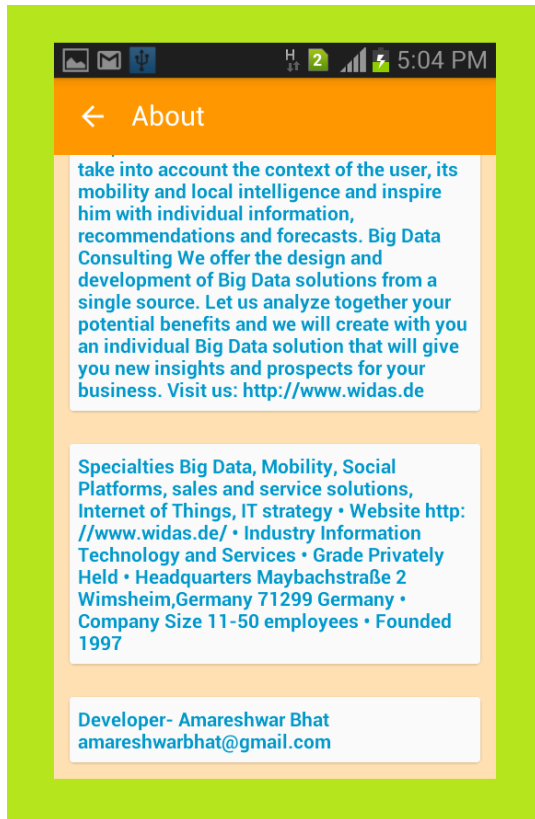

This window tells more about the Company WIDAS.

18. About with Collapsing Tool Bar

The image will be collapsed until you exit the scroll.

19. About Part2

This tells the user to the history of Company WIDAS.

20.FullScreen Image

On clicking the image in Gallery module the full image will be displayed.
